Forewords

As President of the Nursing and Midwifery Board of Ireland, I am delighted to publish the State of the Register 2023.

Now in its second year, this publication is an important tool for workforce planners, policymakers and our other key stakeholders, as they work to ensure that the Irish healthcare system is equipped to meet the needs of today and the future.

On behalf of the Board, I would like to acknowledge my NMBI colleagues for their commitment to our digitisation programme, which has made this publication possible. In particular, I would like to thank NMBI CEO, Sheila McClelland and Director of Registration, Dr Ray Healy.

I would also like to express my appreciation to our registered nurses and registered midwives for their continued engagement with the annual renewal process. The Board and I would like to thank them for their commitment to the professions and assure them that we will continue to support them in providing high standards of professional practice.

Dr Louise Kavanagh McBride
President
Nursing and Midwifery Board of Ireland

NMBI's aim since the outset of our digitisation programme, has been to ensure that we have modern systems in place to operate efficiently in the best interests of our registrants and the public.

The data we gather through the annual renewal process allows us to share emerging trends in health service staffing, to assist our stakeholders in future planning. This year's publication of the State of the Register report is particularly crucial to NMBI and our healthcare colleagues as we can now provide a comparison to last year and identify areas of growth and potential gaps.

From the data we have gathered in this report, we can see that our Register continues to grow year on year. In the period covered in this report (1 June 2022 to 31 May 2023), there was a 4% increase in the number of nurses and midwives on our Register. There is also a continued increase in the number of new registrants joining our Register. I would like to welcome all those joining and express my appreciation to all our nurses and midwives for their continued care, compassion and professionalism.

Sheila McClelland
Chief Executive
Nursing and Midwifery Board of Ireland

We are

the regulatory body
for the professions
of NURSING
and MIDWIFERY
in Ireland.

Our Vision

is to provide leadership
to registered nurses and
midwives in delivering safe
care through innovative and
proactive professional
regulation.

Our Mission

is to protect the public
and the integrity of the
professions of nursing and
midwifery through the
promotion of high standards
of education, training,
and professional
conduct.

Our Values

define the way we operate as an
organisation and shape our culture.
In all that we do we endorse and strive
to live the core nursing and midwifery
values of compassion, care and commitment,
which are at the heart of the professions, and
we work to ensure they are at the heart
of NMBI, for the good of registrants
and our colleagues within
the organisation.

What we do

In our role as the regulator for the professions of nursing and midwifery and in fulfilling our mission, we:

- maintain the [Register of Nurses and Midwives](#) and a Candidate Register for student nurses and midwives
- set the [standards](#) for the education of nurses and midwives
- approve programmes of education necessary for registration and monitor these programmes on an ongoing basis
- support our registrants by providing appropriate guidance on professional conduct and ethics for both registered nurses and midwives
- investigate and consider [complaints](#) against nurses and midwives.

Our role in setting standards and providing guidance for approximately 85,000 registered nurses and midwives in Ireland focuses on public safety. We work collaboratively with the Department of Health, employers, managers, representative bodies, educators, other regulatory bodies and our registrants.

Introduction

NMBI is proud to publish the State of the Register 2023. Now in its second year, the report provides an insight into the number of nurses and midwives who are registered, practising and patient-facing in Ireland. It also provides an age profile of our registrants and the counties in which they are working.

This publication aims to share valuable data to assist workforce planners, policymakers and the healthcare system as a whole, to make evidence-based decisions in the interest of the public and the professions.

This year's report provides interesting insights, particularly as we now have two reporting periods to compare.

As part of the annual renewal process, nurses and midwives were required to provide workplace information and state whether they are practising and patient-facing in each division they are registered in. It is important to remember that this information is self-declared, which may result in some subjectivity.

For the purpose of this publication, some assumptions were made about the data available. The primary assumption was that nurses and midwives who joined the Register in the last twelve months did so to practise; therefore, where possible, these new registrants have been incorporated into the 'practising' data presented throughout. We believe this is a reasonable assumption, making the data applicable to the current workforce.

An overview of the numbers

The data in this report was compiled on 1 June 2023 and covers the 12-month period from 1 June 2022 to 31 May 2023.

As of 1 June 2023, there are **84,948** nurses and midwives on NMBI's Register. This accounts for an increase of 4% on the previous year and is the largest number of registrants held by NMBI.

We have also seen a similar increase in the number of practising and patient-facing registrants. There are **79,489** practising (an increase of 5%) and **70,969** patient-facing registrants (an increase of 7%).

On a divisional level, there was an increase in the number of registered General Nurses (5%); and a slight increase in the number of Psychiatric Nurses (0.2%) and Intellectual Disability Nurses (0.2%). While the numbers registered in the Children's Nurses division have decreased overall (down 0.1%), the numbers practising and patient-facing have increased. The same is true for the numbers registered in the Midwives division, down overall (down 3.5%), but with an increase in those practising and the number patient-facing.

The 2023 figures show a **27%** year on year increase (total in this period of 6,257) increase in new registrants joining the NMBI Register. New registrants include nurses and midwives qualified in Ireland, the EU and non-EU countries. The majority of

registrants entering the register for the first time in the past year came from non-EU countries. In the period of this report, **1,584** new registrants qualified in Ireland (up 2%), **4,542** qualified outside the EU (up 50%) and **131** qualified in EU countries (down 64%). It is important to note that since 2022, UK registrants are no longer included in the EU figures.

The report shows an increase in the number of registrations in the post-primary divisions of the Register. In the advanced practice divisions, there was a 23% increase in Advanced Nurse Practitioners and a 43% increase in Advanced Midwife Practitioners. Nurse Prescribers increased by 14%, and Midwife Prescribers increased by 32%. The number of registered Public Health Nurses increased by 2%.

Nurses and midwives who are educated outside of Ireland play an essential role in the Irish health system. From 1 June 2022 to 31 May 2023, NMBI issued **10,679** Decision Letters to overseas applicants. Decision Letters are the first step in the process of ultimately applying to the Register and in the majority of cases, allows the applicants who qualified outside Ireland to fulfil a compensation measure to complete the registration requirements.

Other relevant data is provided in the Appendix section of this report.

Irish educated registration rates (2015-2022)

The graph below depicts the numbers of Irish graduates coming onto the Register for the first time by year between 2015 and 2022.

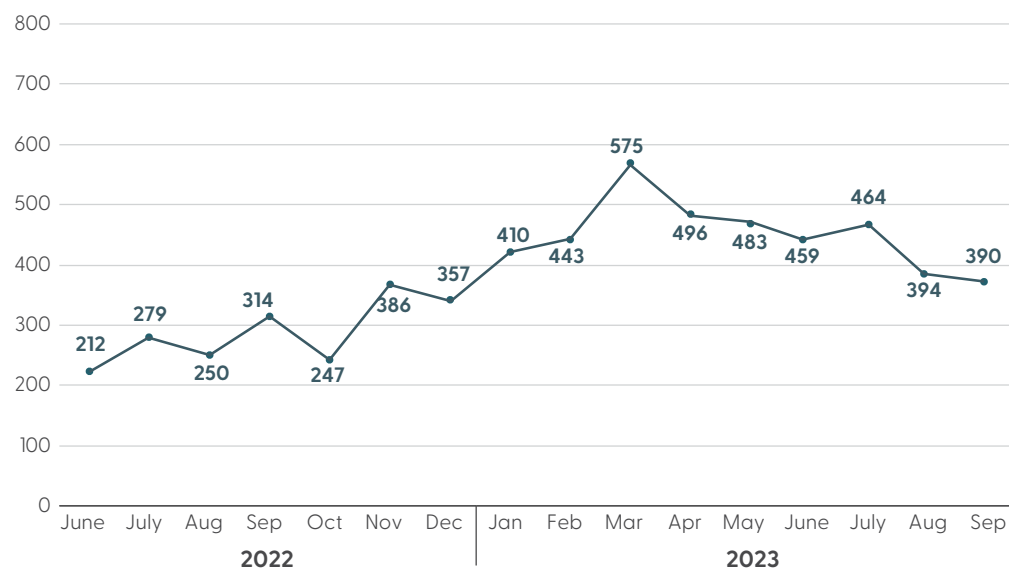

Figure A Number of new Irish educated registrants per year

Certificates of Current Professional Status (CCPS)

NMBI issues Certificates of Current Professional Status (CCPSs) for nurses and midwives who may wish to register abroad. CCPSs are sent directly from NMBI to the equivalent regulatory authority in the country or state where the nurse or midwife is seeking registration. A nurse or midwife may request more than one CCPS in any one year and may request a separate CCPS for each jurisdiction.

Figure B Total number of CCPS requests June 2022 to September 2023

Total: 6,159

Figure C Age distribution of CCPS applications June 2022 to September 2023

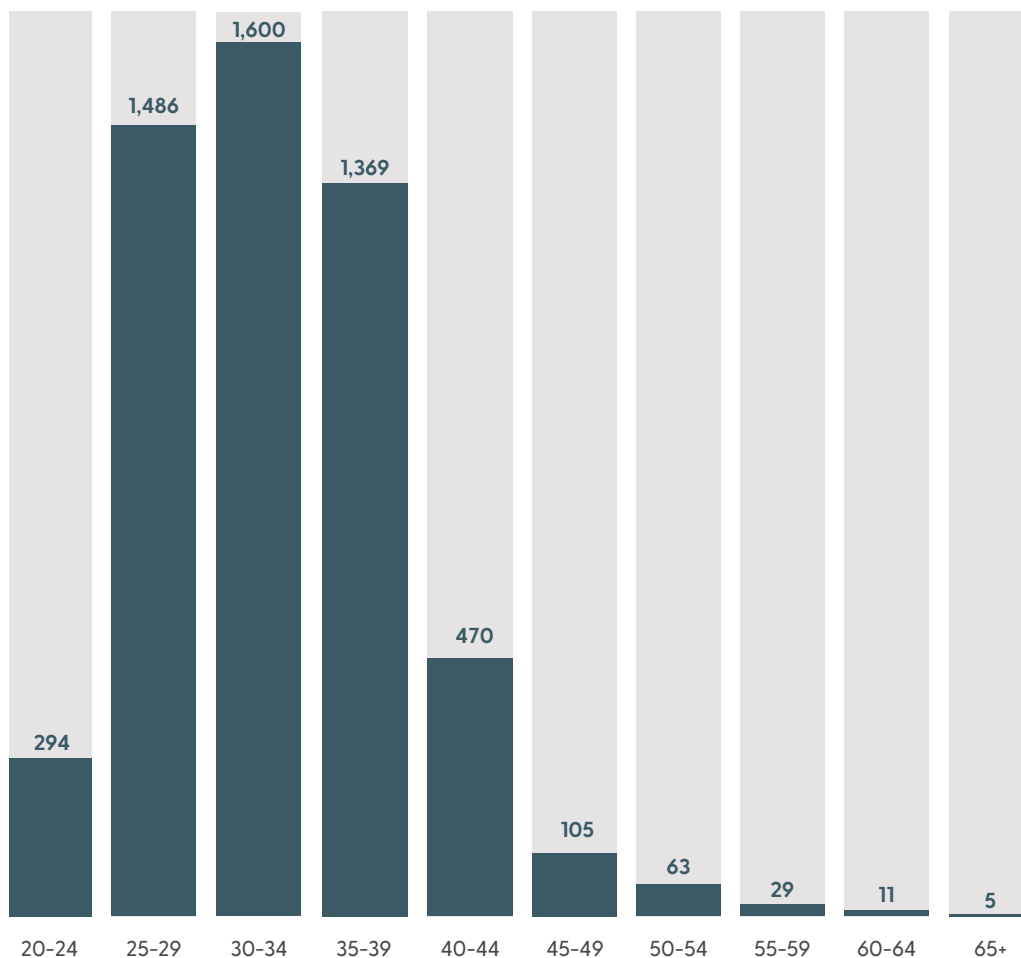

Table A Top five CCPS applications June 2022 to May 2023 – based on nationality

2022			
1		India	2,333
