

Help us reduce the spread of COVID-19 in Ireland

Download the **COVID Tracker App** today.

What does the COVID Tracker app do?

1. Contact tracing

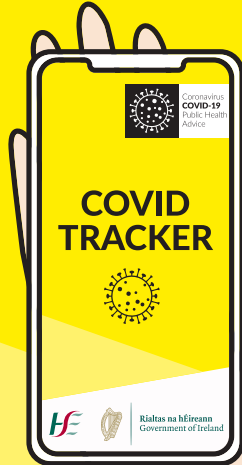

The app helps speed up contact tracing and reach more people with the right advice. It can alert you if you have been in close contact with someone who tests positive for COVID-19. If you test positive, you can choose to upload your records to anonymously alert your close contacts.

2. COVID Check-In

You can use the app to record any symptoms of COVID-19 and get advice on what to do if you have symptoms.

3. Updates on COVID-19

Keep up-to-date on the latest information about COVID-19 in Ireland.

How will you protect my privacy?

- The app exchanges secure, anonymous records when people using the app are in close contact with each other. The app will never identify you to other app users and you cannot access each other's information.
- The app does not collect your name, location or movements.
- You can choose to put your mobile number into the app. If you do, it will only be used by a HSE contact tracing team to provide you with important health advice on COVID-19.

How do I download the COVID Tracker app?

- Go to www.covidtracker.ie on your phone and follow the steps on the page.
- Or
- Go to the Google Play Store or Apple App Store on your mobile phone. Search 'COVID Tracker Ireland' and click 'Install' or 'Get'.
 - Once you have the app on your phone, follow the steps in the app to set it up. You can uninstall the app at any time.

The more people that use the app,
the more people we can protect.

Stay safe. Protect each other.
